Professional performance

Professional
performance

Veg prep function

A perfect cut

In developing the new range, all the cuts that the different disc and grid combinations offer have been studied in detail.

The new design of the machine, with tighter tolerances, together with the improvements made to the discs and grids, enables a **perfect result** whatever the product and the desired cut.

Professional
performance

Veg prep function

New discs and grids

Thanks to the renewed disc and grid design, **less effort is required for cutting**, obtaining clean and uniform cuts with practically no shrinkage.

Professional
performance

Veg prep function

Clean and uniform cubes

The combination of the **FC discs** with their corresponding **FMC grids** ensures precise and clean cube cuts, with no liquid generated.

Professional
performance

Veg prep function

New “Déli-cut”: A cut with a unique identity

The new **Déli-cut** is a brunoise type cut of 4 x 4 x 8 mm, making it unique for cooking, sautéing, dressing salads and preparations, cooking fillings, and much more.

Professional
performance

Cutter function

Multiple functions in seconds

Use the cutter function to **cut, grind, mix, knead or emulsify** any product, in seconds.

A model for every requirement

All the combined models are **variable speed**. The head varying in the cutter function and the size of the bowl varying in the cutter function between the different models. The offer is complemented with a wide range of accessories available for each model.

Range	ULTRA			
Modelo	CK-35V	CK-38V	CK-45V	CK-48V
Speed	Variable	Variable	Variable	Variable
Cutter head	Universal	Universal	Large capacity	Large capacity
Production/h	200 - 900 lb	200 - 900 lb	400 - 1300 lb	400 - 1300 lb
Cutter bowl	5,5 l	8 l	5,5 l	8 l
Bowl capacity	6.61 lb	8.82 lb	6.61 lb	8.82 lb
Covers	100-450	100-450	100-600	100-600

Professional
performance

Veg prep function

Heads for each requirement

The available **heads are interchangeable** depending on the models so that the machine can adapt to the type of product processed and the desired production output.

Universal hopper

Large Capacity Attachment

Automatic Hopper

Long vegetable attachment

Professional
performance

Veg prep function

Production/hour ranges
from 900 to 1300 lb,
depending on the model
and product used.
On the CK-45V / CK-48V
models, the size of the
inlet mouth allows whole
products such as cabbage
to be inserted.

Higher production

Professional
performance

Veg prep function

High ejector

The CK-45V / CK-48V models are equipped with high ejector. The high ejector enables a higher quantity of product to be processed, **obtaining higher yields.**

Professional
performance

Veg prep function

Wide range of discs and grids

The range of discs and grids available enables more than [70 different types of cuts.](#)

Support-car

The support-car enables work to be carried out at the appropriate height, **adapts to Gastronorm measures** for collecting the product and makes it easy to move the machine.

Professional
performance

Cutter function

5.5 and 8 litre cutter bowls

Sammic cutters and emulsifiers are available with a **5.5 or 8 litre capacity bowl** for grinding, mixing, kneading, etc. 3 or 4 kg of product, in seconds.

Cutting blades for each need

The cutter bowl is delivered as standard with a rotor with **toothed blades**. It can optionally be fitted with smooth and perforated blades.

Hub with toothed blades

The toothed blades are **ideal for cutting parsley and products with a high water content** that can be damaged using smooth blades. It is **also** good **for frozen products, nuts, cured ham, cooked meat, purees** (the puree is finer with this type of blade).

Hub with flat blades

The flat blades are indicated **for cutting raw meat**, because the edge and its shape can easily cut the nerve strands and difficult points of the meat. They are also recommended **for vegetables in general**, as it chops very well with only a small quantity of liquid from the product. The smooth blades are **ideal for onions**, **although the Cut&Mix mixer must be used** because the product adheres to the sides of the hopper.

Hub with perforated blades

Use the perforated blades to **make sauces and mix products** such as **mayonnaise, seafood cocktail sauce, aioli garlic mayonnaise,** etc. as well as for certain types of **pastry dough.**

Speed selection

The available speed range **enables the machine to be adapted to the product being processed**, on the slicing as well as the cutting function.

Also, thanks to the brushless motor technology, the motor maintains the torque throughout the speed range, obtaining maximum efficiency at all times.

Brushless technology: maximum efficiency

Brushless technology is synonymous with **optimal performance at any speed.**

The variable speed cutters are equipped with high-efficiency motors using brushless technology.

Brushless motors are **highly efficient**, enabling the same force to be exerted throughout the speed range.

They also **weigh less**, require less space and, since they don't require ventilation, improve the **water tightness** of the machines.

Brushless technology: Force Control System

All models are equipped with the exclusive "Force Control System". The FCS screen shows the force made by the motor at all times. It also enables an audible warning to be programmed for when the machine exceeds the established force. The user therefore obtains the desired cut quality in each product and at all times, achieving an optimum and **uniform cut without shrinkage**.

Professional
performance

Cutter function

The "Cut&Mix" mixer, standard on all models, **prevents the product from adhering to the edges of the bowl**, preventing the product from overheating and obtaining a more homogeneous final product.

"Cut&Mix" mixer: a perfect result

Professional
performance

Cutter function

Reverse function

Thanks to the reverse function,
the blades rotate backwards,
between 100 and 500 rpm,
mixing the product instead of
cutting.

This means that ingredients
can be added during the cycle
and mixed with the product
already cut.

Stainless steel motor block

The stainless steel motor block has a polished external finish and optimal durability. Also, it is easy to clean. The robust aluminium lid makes the entire unit highly durable.

Maximum
comfort for
the user

Maximum comfort
for the user

Veg prep function

Lateral product output

As the product exits on one side, the cutters **require less space on the work surface** and resulting in optimal work flow in the preparation area.

The product output opening is designed to direct the product, **preventing splashing** in the work area.

Maximum comfort
for the user

Veg prep function
CK-35V / CK-38V

The CK-35V / CK-38V models
perform the cutting operation in
a single movement, achieving
**maximum production without
user fatigue.**

Ergonomic design

Maximum comfort
for the user

Cutter function

Opening for adding ingredients

The cutter bowl's cover has an opening through which ingredients can be added during the cycle. The opening has a cover that can be closed when it is not being used, thereby avoiding splashing.

Advanced control panel

The **combi CK** use *brushless technology* and have an advanced control panel. Very intuitive to use, the panel on these machines offers all the information at a glance. The user therefore has maximum control of the process.

Maximum
safety and
hygiene

Maximum safety
and hygiene

Head and cover easy to detach

The head and cover on the Sammic cutters can be easily removed without tools, for exchanging and cleaning. This also makes them versatile and **easy to maintain.**

Maximum safety
and hygiene

Veg prep function

New shredding & grating discs

The new SH grater discs can be removed without using tools and can be washed in the dishwasher.

Product accumulation between the support and the disc is therefore avoided, offering the highest hygiene guarantee.

Maximum safety
and hygiene

Veg prep function

Grid cleaning kit

The grid cleaner kit is designed to remove all the surplus product that is embedded in the grid after the cutting process. The kit consists of a base that has cleaners for the most common grid sizes.

Combination of safety systems

All Sammic cutters are equipped with a combination of safety systems that ensure user protection when the machine is in motion. The position of the head and its cover have **microswitches** that prevent them from being inadvertently switched on and the shut-off safety element prevents accidental start-up of the blades in case of power failure.

Maximum safety
and hygiene

NSF accredited

**Sammic CK cutters are
standard 8 NSF certified,**
which is a safety and hygiene
guarantee.

Sammic:
A leader's
guarantee

Sammic: A leader's guarantee

100% tested

All machines manufactured by Sammic **are individually tested** at the end of the assembly line, thus minimising the risk of post-sales incidents.

Sammic:
A leader's guarantee

The experience of a cutting specialist

Sammic has been designing and manufacturing cutters for more than 50 years.

Exports to more than 100 countries has enabled the company to standardise its quality.

Result: **#ThePerfectCut** for any product.

Sammic: A leader's guarantee

Designed and manufactured in collaboration with chefs

Sammic's **corporate chef** and team actively participated in the entire Sammic cutter development project.

Before they are launched, all models are also tested by the corporate chef and by **Sammic ambassador chefs** from around the world.

And finally, a continuous feedback channel throughout the product's service life enables continuous improvement so that Sammic continues to be **#TheRightChoice** for users around the world.
